

20-20 Fusion launches an exciting new Hepplewhite update

20-20 Fusion is delighted to announce that an update to the existing Hepplewhite Fusion catalogue is now available to all supported customers. Over the past few months, 20-20 Fusion has been listening to constructive feedback from Hepplewhite users with the aim of making the catalogue simpler and more practical to use. In order to streamline Hepplewhite's considerable product portfolio of fitted bedroom and office furniture, the six product lines have now been separated into their own sections: Vinyl, Carnaby, Graphica, Veneer, Panorama and Home Office.

20-20 Fusion has also updated all range colours and handles, as well as fine-tuning the positioning of handles and the availability of units and accessories. All products and style options are now completely up to date for 2009. This release will then be closely followed in February by the scheduled 2010 update to the core Hepplewhite catalogues, now making them the perfect resource for designers.

Ross Biggleston, senior data analyst at 20-20 Fusion comments: "We are confident that our customers will be suitably impressed by the new Hepplewhite catalogue. This update is the end result of months of close co-operation with the Hepplewhite team, who have wholeheartedly supported us in the creation of a new, user-friendly and highly accessible catalogue. We can't wait to hear our customers' reactions to the new and improved version."
