

## PLANIT ANNOUNCES NEW VERSION OF FUSION DESIGN SOFTWARE

Planit International is introducing a new version of its industry-leading design and visualisation software for the kitchen, bedroom, bathroom and home improvement markets.

The new version of Planit Fusion Live – which provides full support for Windows Vista – will be rolled out free of charge to all supported customers from November.

“These enhancements have been made as a direct response to customer feedback,” explains managing director Alastair McPheat. “We are therefore confident that the new features will be well received.”

An exciting optional extra is also offered to registered users of Planit. Future Art Plus provides a much greater amount of control by introducing an additional 14 artistic styles to its portfolio of fully configurable predefined visual effects.

From colour sketches to mosaics, comic strip to oil canvas – the collection offers a wide range of creative potential, underlining Planit’s status as innovators in this field of graphics representation.

Please contact the Planit Support team on +44 (0) 1233 635533 or email [uksupport@planit.com](mailto:uksupport@planit.com) for an early release of the new version, if you are already using Windows Vista. Full details of supported operating systems can be found on our website at [www.planitsoftware.com](http://www.planitsoftware.com)
